

Activator

Low Viscosity
Ready to Use
Low Odor
100% Acrylic
Excellent Bonding

COLOREDCRETE ACTIVATOR

Description:

- Emulsion developed specifically for enhancing the strength,durability and adhesion of cement based products.
- Suitable for the formulation of conventional and lightweight renders and coatings, patching and repair mortars, underlayments and commercial flooring.
- Low-odour formulation ensures reduced worker discomfort during mixing and installation.
- Formulated systems display the typical "100% acrylic" benefit on exterior exposure: no degradation or colour development

Use:

Coloredcrete activator is used as primer, and bonding agent in Render, mortar, light weight coating, patching, scratch coats and number of Coloredcrete products such as Spray-o-crete and Adcrete.

Mixing

Coloredcrete Activator is normally used in mixture with potable water. - Ratio of Activator to water may vary depending to the product and its usage.

Packaging

- 20 Liters

Storage

- Store in cool and covered areas.
- Shelf Life: 12 months from manufacturing date.
